

Mission Ready. People Focused. Results Delivered.

532 Group LLC exists to make change happen. We provide advisory, engineering, and technology services to the U.S. federal Government, collaborating with agencies to achieve mission success. Our deep expertise allows us to see beyond surface-level issues and uncover root causes, developing and delivering innovative solutions that address today's challenges and adapt to tomorrow's priorities.

Digital Services

- Software and API Development
- AI/ML and Automation
- Data Science
- Modernization
- Content Development/Accessibility

Cybersecurity

- Policy Management
- Policy Engineering
- Governance, Risk, and Compliance (GRC)
- Data Loss Prevention (DLP)

Program & Mission Support

- Program Management
- CPIC and Financial Management
- Organizational Change Management
- Training and Workforce Development

Engineering & Infrastructure

- Facilities Engineering and Sustainment
- Digital Engineering (MBSE)
- Systems Engineering
- Spectrum Monitoring and Signal Analytics

We believe in meaningful change. Whether pushing boundaries or relentlessly pursuing the best solution, we create value for organizations and citizens by aligning our work with agency missions.

We leverage the strength of our team. 532 Group's experienced, mission-driven professionals bring the skills and expertise needed to solve problems, enhance operations, and address all project requirements.

We explore the possibilities. Our innovative solutions equip agency teams to excel and outperform their peers. We aren't afraid to tackle big challenges, and we know how to set our clients up for success.

We keep our standards high. Our team applies high standards of excellence through performance-based service delivery. We develop a deep understanding of problems and rigorously test solutions to meet the demands of mission-critical tasks.

Past Performance Highlights

At 532 Group, we demonstrate our capability to enhance operational efficiency and drive innovation with a proven track record in delivering high-impact solutions across various domains:

VA U.S. Department of Veterans Affairs

OIT – Cybersecurity Engineering & Architecture: Implementation of the Zero Trust Data Pillar and data loss prevention (DLP) practices across VA.

OIT OIS ISPS – Security & Privacy Policy: Content development for directives/handbooks (RMF); research on emerging cybersecurity topics; and analysis, review, and tracking of policy publications.

OIT SPM – Risk Management: Oversight of Authorization to Operate (ATO) processes, quadrupling approval durations from 90 days to two years.

OIT SPM, OIT EPMO – Platform Sustainment & Optimization: Software development and O&M for VBA and VHA (EHR) systems, including database, workflow, automation, and app functionality optimizations.

OIT EPMO BAM – Legacy Modernization: Mainframe-to-cloud conversion for VA's life insurance system.

OIT EPMO – Accounting & Finance: Interface design support for VA's General Ledger. Resolution of critical fraud, waste, and abuse (FWA) issues for VA Office of Community Care (OCC) claims data.

OIT ECO, VBA PA&I – Data Management & Analytics: Enhancement and sustainment of the Enterprise Data Warehouse (EDW) to increase availability and scalability for rapid growth. Support for BI reporting across 57 regional offices. Quality assurance and business analysis for VA's enterprise-wide IT service desk.

OIT SPM, BAM, VBA VR&E – Communications, Writing, & Section 508 Compliance: Communications and executive support for VA divisions. Section 508-compliant content development and updates, including technical writing, for systems documentation, enterprise communications, and program data.

VBA VR&E – Training Development & Delivery: In-person and virtual training events, demonstrations, and materials for the nationwide rollout of VR&E's new case management system.

CFM – Market Area Assessments & Strategic Analysis: Data analytics, National Planning Strategies (NPS) service line market distribution, and architectural medical planning and engineering, with select initiatives performed in partnership with DoD, for VA's Office of Construction and Facilities Management (CFM), supporting nationwide health care assessments to improve Veteran care.

HHS U.S. Department of Health and Human Services

OCIO – Data Analytics: Development of data visualizations, reporting automation, and database migration, supporting data analysis and improved decision-making for multiple HHS divisions.

CMS HHS Centers for Medicare & Medicaid Services

OIT AMG – FISS Claims Processing Modernization: Development and testing of legacy and modern code, as well as implementation of modern development tools and transformation of COBOL code, for a core Medicare claims processing system in CMS's Fee-For-Service environment.

OIT ISPG – Agile Management & Strategic Communications: Agile management, work re-organization, and content development (Drupal platform) for CMS's Office of Information Technology.
